WaterSoft designs, engineers, and supplies the most innovative commercial water treatment systems in the industry. From our extensive standard line of readily-available catalog models, to custom-engineered solutions, we offer equipment for typical commercial applications, including schools, hospitals, apartment complexes, nursing homes, dairy operations, hotels, and public water systems. Our catalog offers a sampling of the Commercial items we have available.

For a special application, including arsenic treatment, please contact the factory.

Fill in a copy, email or FAX it to us and we will quote equipment. If your water quality is unknown, then fill-in everything you can and send it to us, along with a raw water sample (at least 8 oz).

HydroxR ™ Treatment Systems

With "WS" Series Control Valves

Standard Features

- Combines Aggressive Pressurized Aeration with the Oxidation Power of Hydrogen Peroxide.
- Treats extreme levels of Iron, Manganese & Sulfur.
- Disinfection Properties to Treat Iron, Manganese & Sulfur Bacteria
- Catalog systems to 200 gpm
- Aeration Manifold Assembly Machined from Solid PVC Barstock
- Maximum Operating Pressure 125 psi / 110 ° F
- Clack[™] Control Valves
- Ports on Aeration Manifold, for optional chemical injection
- Automatic Self-Regulating Air Volume Control
- Filter-Ag Plus ® Filter Media
- No Raw Water Bypass
- Chemical Feed Pump and Solution Tank
- Electronic Control Valves
- Includes 5 Gallons of Hydrogen Peroxide
- Available in four different configurations

Options

- Bypass Connects directly to each 1" & 1-1/4" Clack control valve and simplifies installation
- Alternate Aeration Tank(s) sizes
- Custom-designed system
- Alternate filter media

Our HydroxR [™] Treatment System combines aggressive aearation technology with oxidation power of hydrogen peroxide for treatment of virtually unlimited levels of iron, manganese and sulfur gas. At the same time bacteriological form of constituents are controlled without the creation of chemical byproducts, contact tanks or the ongoing maintenance of rebedding carbon filters. The included chemical feed pump package is equipped with a Degas head for self-priming operation. Our motor-driven piston control valve is the most reliable even under severe water conditions and resists common adversaries such as dirt, iron and turbidity. Designed for use in commercial, industrial or domestic water applications.

TYPICAL USES: Large Scale Irrigation, Public Water Systems, Dairy Operations, Industrial Pre-Treatment, Hotels / Motels, Apartments / Condos, Nursing Home Facilities, Food / Beverage Manufacturer, Livestock Operations, Schools, Hospitals

Note 1 - For 3450-RPM well pump models at rated GPM, the inlet PSI at the HydroxR[™] Tank must be at least 50% higher than max PSI desired at service. If supply pump cannot achieve this pressure, then use "Variable Speed" models.

Note 2 - See individual drawings containing (PRESS) or (ATMOS) in file name, for specific configuration & piping details.

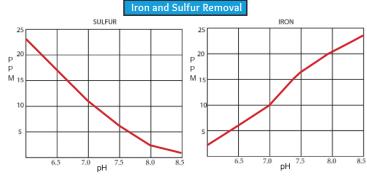

Manganese Removal

HydroxR[™] capability to remove Manganese from water is critically dependent on the Iron and pH levels as show below:

If the Iron to Manganese ratio is:	Then the pH must be at least:
10:1	7.0
5:1	7.8
1:1	8.3
0:1	8.5

If need, pH can be increased by injecting soda ash or caustic into the HydroxR $^{\rm TM}$ Tank Manifold

ReactR [™] Treatment Systems

With "WS" Series Control Valves

Standard Features

- Catalog systems to 200 gpm
- Aeration via Ambient Air NO CHEMICALS •
- Maximum Operating Pressure-125 psi /110°F
- Clack[™] Control Valves
- Aeration Manifold Assembly Machined from Solid PVC Barstock
- Automatic Self-Regulating Air Volume Control
- Smart -Blend Filter Media •

No Raw Water Bypass - While one tank is backwashing, the other tank(s) is (are) still in service (for multi-tank systems only)

- Available in four different configurations
- Ports on Aeration Manifold for optional chemical injection

Options

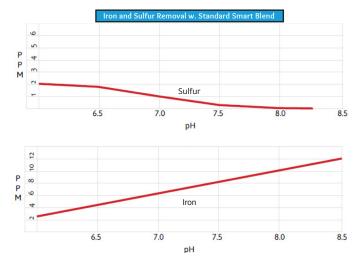

- OXYCLEAN [™] Auto Cleansing Systems recommended for 5 ppm or higher iron and manganese
- Bypass Connects directly to each 1" & 1-1/4" Clack control valve and simplifies installation
- Alternate Aeration Tank(s) sizes ٠
- Custom-designed system
- Alternate filter media

Smart-Blend is the media used on the proportioned mix of two proven filter medias that provide a spectrum of filtering capabilities for a wide range of water problems.

Our REACTR™ Treatment System incorporates aeration technology that efficiently mixes ambient air with water under pressure to convert iron, manganese and hydrogen sulfide gas to filterable particles. The REACTR[™] eliminates the associated stains, taste and odor while also eliminating sediment problems and neutralizing low pH on influent water. Only the highest quality controls and controls and materials are used. Our motor-driven piston is the most reliable under severe water conditions and resists common adversaries such as dirt, iron and turbidity. Designed for use in commercial, industrial or domestic water applications.

Water Temperature Range	35 ° - 110 ° F

Note 1 - WSC & WSHC models backwash with clean and/or raw (blended) water.

Manganese Removal

 ReactR ™ capability to remove Manganese from water is critically dependent on the Iron and pH levels as shown below:

 If Iron to Manganese
 Then the pH must be at ratio is:

 least:
 Image: Comparison of the ph must be at ratio is:

- 10:1
 6:5

 5:1
 7:8

 1:1
 8:3

 0:1
 8:5
- Additional equipment is required for water containing organic and/or bacteria versions
- For "Pressure System" models, at rated GPM, the inlet PSI at the ReactR tank must be at least 50% higher than max PSI at service. If supply pump cannot achieve this pressure, then use "Variable Speed Systems"
- If needed pH can be increased by injecting soda ash or caustic into the ReactR Tank Manifold (Chemical Feed to be supplied by others)

WaterSoft 710 Orange Street Ashland, OH 44805

•

Single - Tank Water Softener

With "WS" Series Control Valves

Standard Features

- High Flow Control Valves thru 3" Flow Rates 200+ gpm
- Up to 1.2 Million Grain Tank Capacity per Tank
- Maximum Operating Pressure 125 psi/110° F
- Clack[™] Control Valves
- Time Clock or Electronic Meter Regeneration
- Premium Cation Resin 30K grains/cu.ft.
- Hard Water Bypass
- Brine Tank HDPE material, Salt Grid Plate or Gravel
 Underbed, Safety Brine Valve (30" & smaller diameter), Air Check and Overflow

Options

- Clean Water Backwash
- No Hard Water Bypass
- Electro-Mechanical Control Valve
- Mechanical Flow Meter
- High Capacity Resin

Automatically reduce hardness (calcium/magnesium) and dissolved iron/manganese along with their unpleasant side-effects. Only the highest quality resin, controls and materials are used in CSI Commercial Water Softeners. Our motor-driven piston control valve is the most reliable under even severe water conditions and resists common adversaries such as hardness and iron. Meanwhile, our hub and lateral style distribution systems within the corrosion resistant tanks maximize flow while reducing pressure loss through the units. Designed for use in commercial, industrial or domestic water applications.

OPERATING INFORMATION

For use on Potable Water Only Water

Do not use on microbiologically unsafe or unknown quality water Installation must comply with state and local plumbing/electrical codes 120v/12vac (10WS-20WS), 20vac (20WSH-30WS) CUL/UL listed transformer included with electronic meter systems. Tank warranty void if subject to vacuum. Low flow channeling – less than 1 gpm/cu. ft. resin – may cause hardness leakage Influent Chlorine 1 ppm max.

Water Temperature Range Ambient Air Temperature Range Operating Pressure Range Electronic Requirements Influent Turbidity Iron/Manganese 35° – 110°F 35° – 120°F 20 – 125 psi 110v/60Hz 5 NTU < 5 ppm

With "WS" & "WST" Series Control Valves

Standard Features

- High Flow Control Valves thru 3" Flow Rates up to 181
 gpm
- Up to 1.2 Million Grain Tank Capacity per Tank
- Maximum Operating Pressure 125 psi/110° F
- Clack[™] Control Valves
- Electronic Meter Regeneration
- Duplex Alternating Tank Operation; One Tank is Always in Service
- Premium Cation Resin 30K grains/cu.ft.
- No Hard Water Bypass

Brine Tank – HDPE material, Salt Grid Plate or Gravel Underbed, Safety Brine Valve (30" & smaller diameter), Air Check and Overflow

Options

- Clean Water Backwash
- Electro-Mechanical Control Valve
- High Capacity Resin

Automatically reduce hardness (calcium/ magnesium) and dissolved iron/ manganese along with their unpleasant side-effects. Only the highest quality resin, controls and materials are used in CSI Commercial Water Softeners. Our motor-driven piston control valve is the most reliable under even severe water conditions and resists common adversaries such as hardness and iron. Meanwhile, our hub and lateral style distribution system within the corrosion resistant tanks maximize flow while reducing pressure loss through the units. Designed for use in commercial, industrial or domestic water applications.

OPERATING INFORMATION

For use on Potable Water Only Water

Do not use on microbiologically unsafe or unknown quality water Installation must comply with state and local plumbing/electrical codes 120v/12vac (10WS-20WS), 20vac (20WSH-30WS) CUL/UL listed transformer included with electronic meter systems. Tank warranty void if subject to vacuum. Low flow channeling – less than 1 gpm/cu. ft. resin – may cause hardness leakage Influent Chlorine 1 ppm max.

Water Temperature Range Ambient Air Temperature Range Operating Pressure Range Electronic Requirements Influent Turbidity Iron/Manganese 35° – 110°F 35° – 120°F 20 – 125 psi 110v/60Hz 5 NTU < 5 ppm

*Flow rates shown are possible at all times (one tank is always on-line, & one off-line either regenerating or on standby).

Note1 - For 1" & 1-1/4" Control Valves, standard fittings are NPT-M. Various fittings that quick-connect to control valves are available (PVC solvent-weld, brass sweat, SharkBite®, & John Guest®). Please contact factory.

"WS" series have (2) control valves (one on each resin tank), while "WST" series have single control valve, second tank head, & interconnect piping.

Progressive Flow Water Softener

With "WS" Series Control Valves

Standard Features

- High Flow Control Valves thru 3" Flow Rates over 500 gpm
- Up to 1.2 Million Grain Tank Capacity per Tank
- Maximum Operating Pressure 125 psi/110° F
- Clack[™] Control Valves
- Electronic Meter Regeneration Immediate; Only One at a Time, Allowing Treated Water 24 x7
- Progressive Flow
- Premium Cation Resin 30K grains/cu.ft.
- No Hard Water Bypass

Brine Tank – HDPE material, Salt Grid Plate or Gravel

 Underbed, Safety Brine Valve (30" & smaller diameter), Air Check and Overflow

Options

• High Capacity Resin

Automatically reduce hardness (calcium/ magnesium) and dissolved iron / manganese along with their unpleasant side-effects. Only the highest quality resin, controls and materials are used in CSI Commercial Water Softeners. Our motor-driven piston control valve is the most reliable under even severe water conditions and resists common adversaries such as hardness and iron. Meanwhile, our hub and lateral style or Vortech[™] distribution system within the corrosion resistant tanks maximize flow while reducing pressure loss through the units. Designed for use in commercial, industrial or domestic water applications.

OPERATING INFORMATION

For use on Potable Water Only Water

Do not use on microbiologically unsafe or unknown quality water Installation must comply with state and local plumbing/electrical codes 120v/12vac (10WS-20WS), 20vac (20WSH-30WS) CUL/UL listed transformer included with electronic meter systems. Tank warranty void if subject to vacuum. Low flow channeling – less than 1 gpm/cu. ft. resin – may cause hardness leakage

Influent Chlorine 1 ppm max.

Water Temperature Range Ambient Air Temperature Range Operating Pressure Range Electronic Requirements Influent Turbidity Iron/Manganese 35° – 110°F 35° – 120°F 20 – 125 psi 110v/60Hz 5 NTU < 5 ppm

WaterSoft 710 Orange Street Ashland, OH 44805

Product Specifications

Progressive Flow Water Softener

ice.	Can operate with all tanks in service together (unless one is regenerating). During periods of low flow, tank(s) automatically drop-out, which prevents channeling. When demand increases, tank(s) IMMEDIATELY are automatically placed back into service.

Note 1 - Flow rates shown are conservative minimum possible at all times (they're assuming one tank is off-line regenerating).

Note 2 - The most-common models are listed; please contact factory if your job requires a tank & control valve combination other than above.

With "WS" Series Control Valves

Standard Features

- High Flow Control Valves thru 3" F140 gpm / tank
- Up to 24 cu.ft. Media per Tank
- Maximum Operating Pressure 125 psi/110° F
- Clack[™] Control Valves
- Raw Water Backwashing Raw Water Bypass
- Premium Grade and NSF Approved Media
- Electronic Control Valves
- Media included on all units Optional Less Media

Options

- Clean Water Backwash
- No Raw Water Bypass
- Special Media for Custom Applications

Automatic backwashing water filters are the answer for solving common water quality problems. Only the highest quality, proven media and controls are used in a CSI Automatic Water Filter; for removal of taste, odor, color, sediment, low pH and iron. Our motor-driven piston control valve is the most reliable under even severe water conditions and resists common adversaries such as dirt, iron and turbidity. Meanwhile, our hub and lateral style distribution system within the corrosion-resistant tanks maximize flow while reducing pressure loss through the units. Designed for use in commercial, industrial or domestic water applications.

Always consider BACKWASH req'd; multiple units may be needed. For use on Potable Water Only Water

Do not use on microbiologically unsafe or unknown quality water Installation must comply with state and local plumbing/electrical codes 120v/12vac

(10WS-20WS), 20vac (20WSH-30WS) CUL/UL listed transformer included.

Tank warranty void if subject to vacuum. Low flow channeling – less than .5 gpm/cu. ft. media – may cause untreated water bleed. Influent Chlorine 1 ppm max.

Water Temperature Range	35º − 110ºF
Ambient Air Temperature Range	35º − 120ºF
Operating Pressure Range	20 – 125 psi
Electronic Requirements	110v/60Hz
Influent Turbidity	5 NTU
Influent Chlorine	1 ppm max.
Iron/Manganese	< 5 ppm

Standard Features

- High Flow Control Valves thru 3" F140 gpm / tank
- Up to 18 cu.ft. Media per Tank
- Maximum Operating Pressure 125 psi/110° F
- Premium Grade and NSF Approved Media
- For pH adjustment or taste / odor
- No backwash waste water
- Media included on all units Optional Less Media

Options

- Clean Water Backwash
- No Raw Water Bypass
- Special Media for Custom Applications •

Upflow water filters are the answer for solving common water quality problems. Only the highest quality, proven media and materials are used in a CSI Upflow Water Filter; for removal of taste, odor, color, or low pH Meanwhile, our hub and lateral style distribution system within the corrosion-resistant tanks maximize flow while reducing pressure loss through the units. Designed for use in commercial, industrial or domestic water applications.

OPERATING INFORMATION

For use on Potable Water Only Water

Do not use on microbiologically unsafe or unknown quality water Installation must comply with state and local plumbing/electrical codes 120v/12vac (10WS-20WS), 20vac (20WSH-30WS) CUL/UL listed transformer included with electronic meter systems. Tank warranty void if subject to vacuum. Low flow channeling - less than 1 gpm/cu. ft. resin - may cause hardness leakage

Influent Chlorine 1 ppm max.

Water Temperature Range	35º − 110ºF
Ambient Air Temperature Range	35º − 120ºF
Operating Pressure Range	20 – 125 psi
Influent Turbidity	5 NTU
Iron/Manganese	< 5 ppm

WaterSoft 710 Orange Street Ashland, OH 44805

Water Filters & Cartridges

Standard Features

- Simple Filter changes without tools
- No backwash wastewater
- Compact 8"D x 40"H
- 2" in/out (up to 150 gpm)
- NSF Standard 61 Listed
- 150psi working pressure

Activated Carbon Filter for Taste/Order Removal & Sediment

Cartridge Tanks									
General Specifications	CTF8-HF								
Color	Black								
Inlet / Outlet (in.)	2" SOC-F								
Maximum Flow Rate (gpm)	100 / 150								
Dimensions (in.)	8″ D x 40″ H O/A								

General Specifications	CT-ACP (Red-High Flow Only)
Micron Rating	5
Treatment Description	Chlorine / Sediment
Max Flow Rate / psi drop	150 / 12
Typical Life 2PPM Chlorine	> 140K Gallons

Filters for Sediment Removal

General Specifications	CT-P1A (Red-High Flow Only)	CT-P5 (Red-High Flow Only)	CT-P20 (Red-High Flow Only)
Micron Rating	Absolute 1	5	20
Treatment Description	Sediment / Cyst	Sediment	Sediment
Max Flow Rate / psi drop	100 / 9	125 / 9	135 / 8

WaterSoft 710 Orange Street Ashland, OH 44805

"LC" Series Light Commercial up to 348 GPD

Standard Features

- NSF Certified Membrane
- FRP Membrane Housing
- Aquatec Booster Pump
- Inlet Solenoid Valve
- 20" Sediment Pre-Filter 5-micron
- 20" Carbon Block Pre-Filter
- 20" GAC Post-Filter
- SS Operating Pressure Gauge
- SS Powder Coated Frame
- Removes 92-98% of TDS (Total Dissolved Solids)
- Set-up for use with Pressure Tank (tank not included)
- Can also be used with Atmospheric Tank
- Includes Long Reach Chrome Faucet
- Includes 115V power cord
- Easy to Install and Maintain

Pressure Tanks (-gal's): RO-14, RO-20, RO-32, RO-119

Model Numbers	LC-200P	LC-300P	LC-380PP						
Membrane PN (qty)	W-1812-100 (2)	W-1812-100 (3)	W-1812-100 (3)						
Membrane Size	Membrane Size 1.8" x 11.75"								
Sediment Pre-Filter PN		MB520 (1 used per unit)							
Carbon Block Pre-Filter PN		CB20 (1 used per unit)							
Carbon Post-Filter PN	FI-0	GAC020HP (1 used per u	nit)						
*GPD (77°F, 1000 TDS water)	183	238	348						
*GPD (60°F, 1000 TDS water)	134	173	254						
*GPD (45°F, 1000 TDS water)	88	114	149						
Recovery Rate	38%	44%	44%						
Operating PSI	10-125	10-125	10-125

Amps	2	2	up to 5						
W x H x D	21 x 32 x 10	21 x 36 x 10	21 x 36 x 10						

*At 8 hours per day maximum continuous operation, followed by 1-hour downtime (therefore, 22 hours per day maximum possible accumlated run-time).

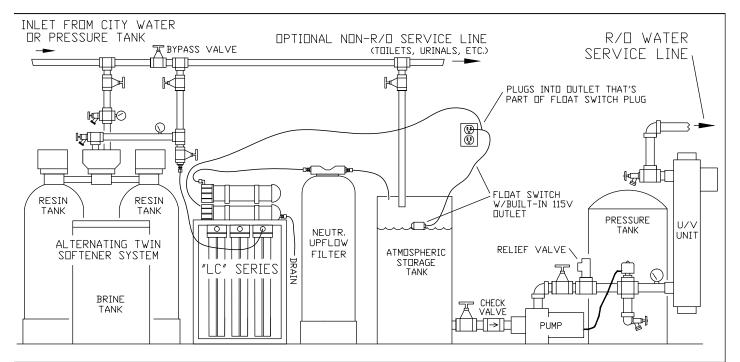

"LC" Series Operating Information

The water	r entering this RO unit must be:
Hardness	Less than 1 GPD
Free Chlorine	Permissible - Carbon Block Pre-Filter must be periodically replaced
TDS	Less than 2,000 ppm
Turbidity SDI (Silt Density Index)	Less than 5 ppm
рН	3-11
Iron	Less than 0.01 ppm
Silica	Less than 1 ppm
Hydrogen Sulfide	0 ppm
Manganese	Less than 0.01 ppm
Tannins	Less than 1 ppm
Temperature	40°F - 80°F
Feed Pressure	10 psi minimum
Duty Cycle	8 hours max continuous operation

The water exiting this unit will have a lower pH, and will attack any metal piping or metal fixtures. For these applications, we recommend post-treament with an Up-Flow Neutralizer filter.

Below drawing shows typical pre-treatment*, re-pressurization* & post-treatment*. It also shows optional use with atmospheric holding tank*, which requires float switch* with built-in 115 outlet. *not included

A1003-1

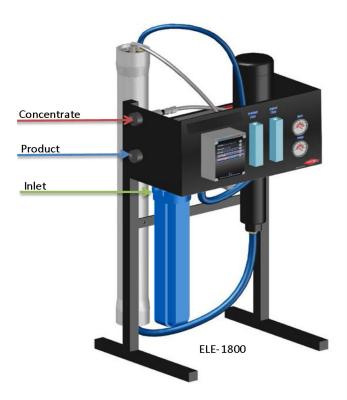

WaterSoft 710 Orange Street Ashland, OH 44805

"ELE" Series Commercial RO 800 - 4,800 GPD

Standard Features

- Free Standing Powder-coated frame
- Automatic low pressure safety shut-off & System Re-Start
- 5-micron Sediment Pre-Filter with Pressure Relief
- Multi-stage high-pressure Pump
- Hi TDS alarm settings
- Fiberglass Membrane Housings
- High Flow, Low Energy Membranes
- Panel mounted PSI Gauges (2) & Flow Meters (2)
- Panel Mounted Concentrate Valve
- Includes RO Production Float Assembly
- Available in 115 VAC or 230 VAC
- Pre-treat lockout
- Auto-Flush
- Removes 95% 98% of TDS.

WaterSoft 710 Orange Street Ashland, OH 44805

"DFS" & "DWM" Series Commercial RO 1,800 - 18,000 GPD

Standard Features

- Wall-Mount (DWM) Powder-coated frame
- Free Standing (DFS) Powder-coated frame
- Automatic low pressure safety shut-off & re-start
- Sediment Pre-Filter with Pressure Relief
- Multi-stage high-pressure pump
- LED Digital display TDS, Temperature, System Status & Runtime
- Fiberglass Membrane Housings
- High Flow, Low Energy Membranes (4" X 40")
- Panel mounted PSI Gauges (3) & Flow Meters (2)
- Panel Mounted Concentrate Valve
- Includes RO Production Float Assembly
- 230 VAC 1-Phase
- Pre-treat lockout
- Auto Membrane Flush to increase efficiency and life span
- Removes 95% 98% of TDS

V3006 Inline Bypass Assembly

Features

- This bypass can be installed on any 1" or 1-1/4" "WS" or "WST" series commercial models.
- One required per control valve

Operating Pressure Range Water Temperature Range 20 – 125 psi 40° – 110°F

WaterSoft 710 Orange Street Ashland, OH 44805

WATER TREATMENT EQUIPMENT

This warranty cannot be transferred - it is extended only to the original purchaser or first user of the product. by accepting and keeping this product, you agree to all of the warranty terms and limitations of liability described below.

Important Warning: Read carefully the WaterSoft Equipment Installation, Operating and Maintenance Instructions Manual to avoid serious personal injury and property HAZARDS and to ensure safe and proper care of this product.

Model Numbers Covered: Water Softeners, Media Filters and Upflow Filters

*FOR AS LONG AS YOU OWN AND LIVE IN YOUR SINGLE FAMILY HOME, this warranty covers your water treatment equipment, if you are the first user of this WaterSoft equipment and purchased it for single family home use - subject to all of the conditions, limitations and exclusions listed below. Purchasers who buy the WaterSoft Water Treatment Systems equipment for other purposes, and other component parts are subject to more limited warranties and you should read all of the terms included in this form to make sure you understand your warranty.

What is covered by this warranty?

WaterSoft Systems warrants that at the time of manufacture, the water treatment equipment shall be free from defects in material and workmanship as follows:

Product	Warranty			
Residential Mineral Tank	10 Years			
Commercial Mineral Tank	5 Years			
Proprietary Control Valves	7 Years			
Other Softener / Filter Control Valves	5 Years			
Brine Tank (30" or Smaller)	5 Years			
Brine Tank (39" or Larger)	1 Year			
Residential Reverse Osmosis System	5 Years			
Commercial Reverse Osmosis System -Pumps & membranes are pro-rated per month	1 Year from Ship Date			
Other Accessories and Parts	1 Year			
Brine Tank Components	1 Year			
REVERE Wireless Low Salt Alarm	90 Days			

* This warranty does not include media and/or cartridge filter elements.

Additional Terms & Conditions

What WaterSoft will do if you have a covered warranty claim WaterSoft will at its option either make repairs to correct any defect in material or workmanship or supply and ship either new or used replacement parts or products. WaterSoft will not accept any claims for labor or other costs.

Additional Exclusions and Limitations

This warranty is non-transferable and does not cover any failure or problem unless it was caused solely by a defect in material or workmanship. In addition, this warranty shall not apply:

- If the water treatment equipment is not correctly installed, operated, repaired and maintained as described in the Installation, Operating & Maintenance Instructions Manual provided with the product.

WaterSoft 710 Orange Street Ashland. OH 44805

- Defects caused as a direct result of the incoming water quality
- If the tank is not the size indicated for the supply line size of the installation, as described in the manual.
- To any failure or malfunction resulting from abuse (including freezing), improper or negligent; handling, shipping (by anyone
- If the unit has not always been operated within the factory calibrated temperature limits, and at a water pressure not exceeding 125 psi other than WaterSoft), storage, use, operation, accident; or alteration, lightning, flooding or other environmental conditions;
- To any failure or malfunction resulting from failure to keep the unit full of potable water, free to circulate at all times; and with the tank free of damaging water sediment or scale deposits;
- This warranty does not cover labor costs, shipping charges, service charges, delivery expenses, property damage, administrative fees or any costs incurred by the purchaser in removing or reinstalling the water treatment equipment.
- The warranty does not cover any claims submitted to WaterSoft more than 30 days after expiration of the applicable warranty, and does not apply unless prompt notice of any claim is given to an authorized WaterSoft Dealer or to WaterSoft or a designated contractor is provided access to the installation and to the water treatment equipment.

THESE WARRANTIES ARE GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. NO WATERSOFT REPRESENTATIVE OR ANY OTHER PARTY IS AUTHORIZED TO MAKE ANY WARRANTY OTHER THAN THOSE EXPRESSLY CONTAINED IN THIS WARRANTY AGREEMENT.

Additional Warranty Limitations

ANY IMPLIED WARRANTIES THE PURCHASER MAY HAVE, IN-CLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL NOT EXTEND BE-YOND THE APPLICABLE TIME PERIODS SPECIFIED ABOVE. Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply to you.

Limitations of Remedies

The remedies contained in this warranty are the purchaser's exclusive remedies. In no circumstances will WaterSoft or the seller of the product be liable for more than, and purchaser-user's remedies shall not exceed, the price paid for the product. In no case shall WaterSoft or seller be liable for any special, incidental, contingent or consequential damages. Special, incidental, contingent and consequential damages for which WaterSoft is not liable include, but are not limited to, inconvenience, loss or damage to property, consequential mold damage, loss of profits, loss of savings or revenue, loss of use of the products or any associated equipment, facilities, buildings or services, downtime, and the claims of third parties including customers. Some states do not allow the exclusion or the limitation of incidental or consequential damages, so the above limitations or exclusion may not apply to you.

What to do if you have a problem covered by this warranty Any warranty coverage must be authorized by WaterSoft. Contact the person from whom you purchased the product, who must receive authorization from a WaterSoft Dealer.

If your product is new and not used and you wish to return it, contact your WaterSoft Dealer.
